

— means it's RDB related

— means it's NoSQL related

When ER-mapping for table schema,
simply ignore all red lines. (NoSQL has
no schema)

For NoSQL, we have the following collections: (for all the "?" below means I don't think
it's a necessary attributes)

① exams:

- default: exam_id, in_course_id, create_by_user_id (?), exam_name, exam_date, create_date, description
- optional: attachments

② materials:

- default: m_id, in_course_id, create_by_user_id (?), m_name, create_date
- choose one: path_to_file, URL, description

③ assignments:

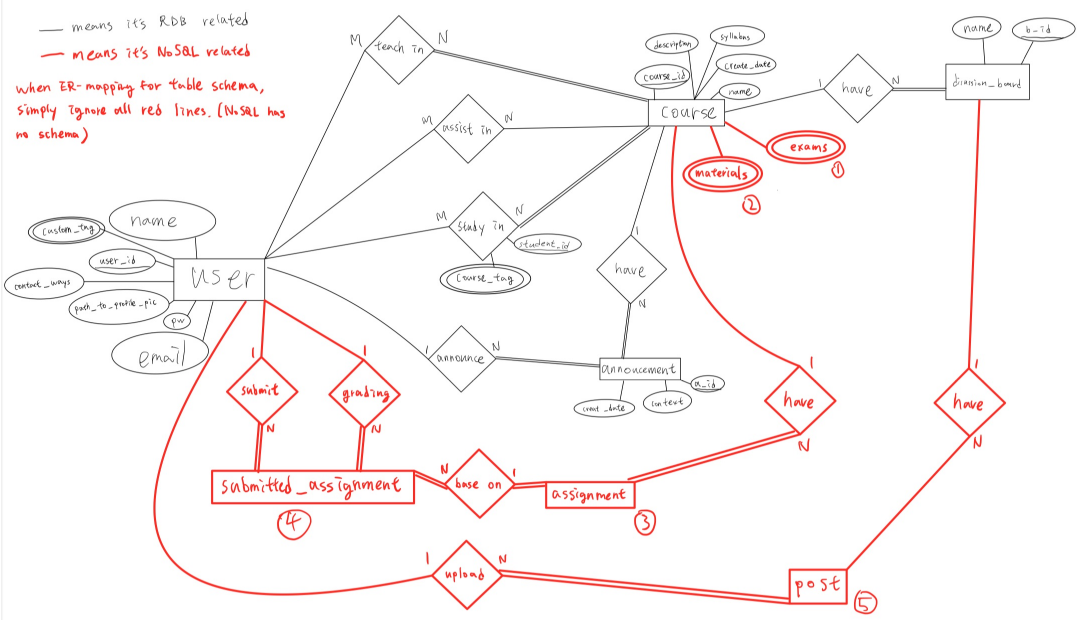

- default: ass_id, in_course_id, create_by_user_id (?), ass_name, create_date, end_date
- optional: description, attachments

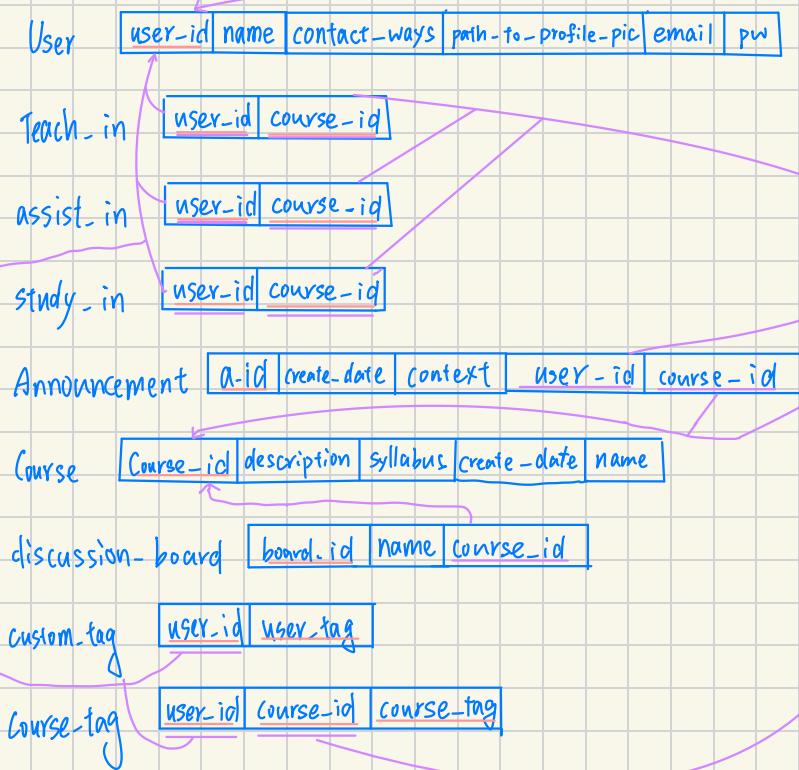

④ submitted_ass:

- default: s_ass_id, ass_id, submit_by_user_id, submit_user_course_tag, submit_date
- afterward: points, graded_by_user_id
- optional: description

⑤ post:

- default
- post_id
 - post_by_user_id
 - post_user_custom_tag
 - description
 - post_date
 - comments
 - public
- optional
- in_b_id
 - post_tags

primary key

foreign key

① exams:

default

{
exam_id
in_course_id
create_by_user_id (?)
exam_name
exam_date
create_date
description

optional { attachments

```
{  
  "exam_id": "int", //default  
  "in_course_id": "int", //default  
  "create_by_user_id": "int", //default  
  "exam_name": "string", //default  
  "exam_date": "date", //default  
  "create_date": "date", //default  
  "attachments": [//optional  
    {  
      "filename": "string",  
      "url": "string"  
    }  
  ]  
}
```

```
{  
  "m_id": "int", // default  
  "in_course_id": "int", // default  
  "create_by_user_id": "int", // default  
  "m_name": "string", // default  
  "create_date": "date", // default  
  "path_to_file": "string", // choose one  
  "description": "string" // choose one  
}
```

② materials :

default {
 m_id
 in_course_id
 create_by_user_id (?)
 m_name
 create_date

choose one {
 path_to_file
 URL
 description

```
{
  "ass_id": "int", // default: 每個 document 必須有
  "in_course_id": "int", // default: 每個 document 必須有
  "create_by_user_id": "int", // default: 每個 document 必須有
  "ass_name": "string", // default: 每個 document 必須有
  "create_date": "date", // default: 每個 document 必須有
  "end_date": "date", // default: 每個 document 必須有
  "description": "string", // optional: 可選欄位
  "attachments": [ // optional: 可選欄位
    {
      "filename": "string",
      "url": "string"
    }
  ]
}
```

③ assignments: default {
 ass_id
 in_course_id
 create_by_user_id (?)
 ass_name
 creat_date
 end_date
optional {
 description
 attachments

```
{  
  "s_ass_id": "int", // default: 每個 document 必須有  
  "ass_id": "int", // default: 每個 document 必須有  
  "submit_by_user_id": "int", // default: 每個 document 必須有  
  "submit_user_course_tag": "string", // default: 每個 document 必須有  
  "submit_date": "date", // default: 每個 document 必須有  
  "points": "number", // afterward: 非必要，事後才可能有  
  "graded_by_user_id": "int", // afterward: 非必要，事後才可能有  
  "description": "string", // optional: 可選欄位  
}
```

④ submitted_ass:

default	{	s_ass_id
		ass_id
		submit_by_user_id
		submit_user_course_tag
		submit_date
afterward	{	points
		graded_by_user_id
optional	[	description

```
{  
  "post_id": "int", //default  
  "post_by_user_id": "int", //default  
  "post_user_custom_tag": "string", //default  
  "description": "string", //default  
  "post_date": "date", //default  
  "public": "boolean", //default  
  "in_b_id": "int", //optional  
  "post-tags": "array" //optional  
}
```

⑤ post:

default {
 post_id
 post_by_user_id
 post_user_custom_tag
 description
 post_date
 comments
 public
optional {
 in_b_id
 post_tags
